EDUCATION

North Carolina State University, Master of Science in Computer Science (Anticipated May 2021)
Coursework: Foundations of Data Science, Algorithms, Databases, Business Intelligence, User Experiences, Artificial Intelligence

The University of Mumbai, Bachelor of Engineering in Information Technology Aug 2015 to June 2019
Coursework: Big Data, Operating Systems, Neural Networks, Software Engineering, Object-Oriented Programming **GPA: 9.35/10**

SKILLS

- Languages	Python, Java, C++, Shell Scripting
- Databases	MySQL, MongoDB, Microsoft SQL Server
- Frameworks	React, Node.js, Bootstrap, Vue.js, Flask, Laravel, Django, Apache Spark, Hadoop, Kafka
- Web Technologies	HTML, CSS, PHP, JavaScript, JSON, XML, Restful API's
- Libraries	Pandas, NumPy, Scikit-learn, TensorFlow, NLTK, OpenCV, JDBC
- OS & Tools	Windows, Linux, Git, VS Code, Android Studio, AWS, Docker, Anaconda, Github, Slack

EXPERIENCE

Full Stack Web Developer Intern | VESIT Renaissance Cell (VRC) | India May 2018 to Oct 2018

- Led a team of 4 developers to work on the Student Enrollment and Attendance module in a content management system.
- Designed and developed UI components using **React** and improved performance of the web application using Ajax, Content Delivery Network (CDN) and minified stylesheets. Constructed a relational database using **MySQL** and implemented triggers, procedures, and views. Performed thorough unit testing and achieved 90% test coverage across all codebase.

Software Developer Intern | Aduera | India May 2017 to Oct 2017

- Built a responsive and feature-rich user-interface using Bootstrap that allowed customers (students) to drag and drop books into the cart. Took responsibility for code quality checks, unit testing and manage overall progress made by the team on assigned modules.
- Worked on **Django** backend to debugged and improved efficiency of existing features like payment, authentication, and nearest bookstore finder using Google Maps API. Succeeded in achieving a target of an increase in the user-base by 20%.

PROJECTS

A Terminal-based Debugging Tool (NLP, Python, Automation) [\(Source code\)](#)

- Leveraged Stack Overflow to improve debugging by displaying an optimal solution to the error given by a program on execution. Used **Python** and **NLTK** to extract keywords from raw data and created a UI using **Urwid** for displaying solutions on to the terminal.
- Improved productivity by automating the debugging process and reduces the chances of distraction.

A Web Application For Quick File Transfer (Java, Transmission protocols) [\(Source code\)](#)

- Developed a full-fledged application using **Java's Spring** to share files between the computers connected in a LAN.
- Implemented and tested data transmission protocols i.e., **TCP** (Transmission Control Protocol) and **UDP** (User Datagram Protocol) and used them effectively to share various types of files between the computers using their unique IP addresses.

Smart Home Security Using Face Recognition and IoT (Machine Learning, Neural Nets) [\(Source code\)](#)

- Developed an **Android** application for home surveillance, intruder alerts, and to maintain the face database. Used Raspberry Pi's model B to captured images and perform face recognition on them.
- Used Convolutional Neural Networks (CNNs) to implement the LBP algorithm in **Python** to create a model to extract features from images using **OpenCV** for face recognition and achieved 90% accuracy in face detection and recognition.

A Dynamic Resume Builder (Automation, User Experience) [\(Source code\)](#)

- Designed and built a single page web application for resume building using **Vue.js** in a short span of two weeks. Implemented **Search Engine Optimization** (SEO) techniques and tested the compatibility of the website with various types of devices.
- Conducted a survey to improve the User Experience and based on responses improved features like pdf download and cloud storage.

ACHIEVEMENTS & EXTRACURRICULAR

- Published a paper titled [Smart Home Security Using IoT and Face Recognition](#) in the IEEE Explorer.
- Served as a finance team member at a Graduate Student Association and managed events having a footfall of more than 1000.
